

100%
Natural
fertilizer

NatSoil

NatSoil is a nourishing, highly effective, natural Fertilizer produced by the larvae of the Black Soldier Fly (BSF), *Hermetia illucens*. NatSoil is a slow release fertilizer that is high in organic matter content and bio-available nitrogen. Completely free from artificial chemicals, NatSoil is available fresh and can be pelletized. It has an earthy smell and is rich in beneficial microbes. It promotes strong plant growth and can trigger a plant's natural defense mechanisms to deter unwanted pests. NatSoil can be used on its own or in conjunction with other nutrient inputs for the soil. It is excellent as a soil amendment and can also be made into a compost tea.

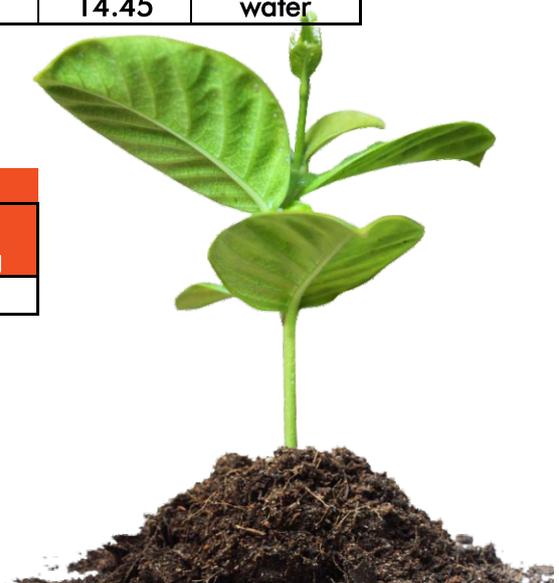

Guaranteed Analysis

PH	Resistance ohm	Moisture (max) %	Density kg/m ³	Organic Matter %	C %	Ash %	Solubility
5.5 -6.5	50	10	412	84.57	29	14.45	Partially soluble in water

412.6	915.28	28239.8	14.15	25.9	12.4

Detailed Use/application guide	
Transplanting	Add a small handful of Natsoil under the roots
Seed Starter	Use instead of coco peat for seedling trays
Compost Tea	Apply 1 kg of Natsoil 20 liters of water and leave to steep for 18 to 24 hours. Use as a compost tea within 24 hours and discard the residue. Apply at the root.
Compost Catalyst	Apply 50g per kg equivalent of compost
Soil Preparation	Apply 0.2kg of Natsoil per sq meter (or 1 tons per acre) 2 weeks prior to planting. Work deep into the soil to add nutrients, microbes and organic matter to feed the soil. A compost tea can be applied every 3 months to maintain soil nutrient level.
